Resume Overview

Your resume is a summary of your education, employment, internship experience, skills, volunteer experience, and research experience. Create an original document on Microsoft Word and avoid using templates.

Employers review resumes in less than one minute, so ensure that your resume focuses on your relevant skills and experiences. The easier you make it for the employer to review, you increase the likelihood that you will receive an interview offer.

Writing Your Resume

Start writing your resume by reviewing examples. Example resumes will give you several ideas for content and formatting for your own resume. Once you create a resume draft, schedule an appointment with the Economics Career Advisor for a resume review. (See [Economics Career Development Office website](#) for information about scheduling an appointment).
